

FOR IMMEDIATE RELEASE

# AUDEA® Introduces The World's First Voice Controlled Intelligent Speaker That Runs Music Apps Without Phone

**Plays Spotify®, Apple Music® Apps & HD EQ Music With or Without a Phone  
Supports Google Assistant®, AirPlay® and Chromecast® in Multiple Rooms  
Plays HD Quality 10 Band EQ Music. Expandable Add-on Hi-Fi Speakers**

**SALT LAKE CITY, JUNE 10, 2019** - AUDEA®, the world's first voice controlled "Intelligent Speaker" that runs hundreds of music and video Apps is being released at CE Week in New York City on June 12, 13 Booth 418. AUDEA is a new class of "intelligent speaker" that unlike simple Wi-fi streaming smart speakers, incorporates an App processor that can run any App such as Spotify® and Apple Music®.

The AUDEA Intelligent Speaker is the only multi-room speaker system that allows you to browse, play and access the features of any music App with or without a phone. Simple "smart speakers" or "smart displays" only stream music. Only AUDEA allows you to browse, create playlists, interact socially, adjust your own personalized equalizer (EQ) sound quality and access any other music App feature.

AUDEA allows you to run any Music App with a full App visual interface so you can play any online streaming music or downloaded music from any music store, in any music format with or without a phone. Other conventional smart speakers like the Amazon® Echo or multi-room speakers like Sonos® require you to either use voice commands or run their software on a phone or desktop computer. You can run any App on AUDEA including music, video, news, weather, home control among others.

Because AUDEA integrates its own HD music player, an HD quality DAC, a 10-band Equalizer (EQ), an advanced DSP digital audio enhancer and allows you to add your own high-fidelity active speakers, AUDEA offers the absolute highest quality audio available in a smart speaker.

“Music lovers just want to browse and listen to their music without having to use their phone” said Douglas Kihm, CEO, Founder. “Audea offers for the first time the freedom to instantly browse and play your favorite music with or without a phone. It’s not just a wifi speaker, it’s a complete intelligent, HD quality, multi-room music player system.” Mr. Kihm continued, “People naturally want to visually browse by artist, genre, personal or daily curated playlist or their stored collection of HD music to choose the music they want to listen to. With conventional smart speakers you can’t browse your music using voice commands so you are forced to use your phone. Smart speakers don’t support HD quality music, EQ and other music App features. AUDEA gives you the simplicity, quality and freedom to instantly browse and play hundreds of music and video Apps without depending on a phone”.

Since music services such as Spotify®, Apple Music® and Pandora® offer virtually the same music, the primary value of the music service is the App’s Graphic User Interface (GUI) and unique features. Only AUDEA gives you full control of the Apps GUI and features without a phone. Only AUDEA plays HD music you own from your own cloud storage such as Google Drive® or Dropbox® so you don’t have to pay monthly subscription storage fees. AUDEA is the only universal solution that plays all SD and HD formats of music including Apple AAC and ALAC, FLAC, WAV, MP3, Ogg Vorbis/Opus, WMA, DTS and music from any music store so you are not locked into one music store or streaming service.

AUDEA is the first to play music over Google Chromecast®, Apple Airplay®, DLNA and standard Wi-fi. AUDEA’s “4Play” allows you to play music 4 ways including voice commands, via its 7-inch color touch display, using its hand-held remote control and with a phone, Mac or PC. AUDEA supports Google Assistant® and the company’s patented VOXXI® voice control via a 4 microphone far-field array. VOXXI® is a revolutionary patented voice control technology that allows you to create your own custom Google Assistant® wake words and voice commands. AUDEA is the first to include a hand-held remote that allows you to easily control music playback including play, pause, skip and volume plus 6 Pre-sets buttons that give you “one-click” selection of your favorite App. AUDEA’s “EasyUp” periodically updates online AUDEA’s software with new VOXXI® commands and other new features.

AUDEA features Android® 9 running on a 1.5 GHz Quad-core A7 processor, a 7-inch color display, 2GB’s of RAM and 16GBs of storage plus an HD 96 kHz/24-bit DAC and a 10 band Equalizer (EQ) HD music player. AUDEA has an Aux Input for connecting a music player or phonograph plus an Aux output to connect to a stereo receiver or amplified speakers including the company’s SoundMate. AUDEA’s unique 2-way Bluetooth transmits and receives music to and from a Bluetooth device. AUDEA’s 16GBs and optional rechargeable battery pack plays stored music without Wifi or AC power. AUDEA incorporates dual 20-watt class D amplifiers that drives a 5-way speaker system including a 4-inch high excursion, neodymium sub-woofer, two 2-inch mid-range drivers and two 1-inch tweeters.

AUDEA will be available from retailers worldwide and on the AUDEA online store beginning August 2019. The AUDEA S40 has a retail price of \$399 MSRP. The AUDEA Q40 with Chromecast® has a retail price of \$449 MSRP. Chromecast® allows you to play the same music in multiple rooms. The SoundMate 60 is a 60-Watt speaker with a 4.5-inch high excursion sub-woofer and 1-inch silk tweeter and has a retail price of \$179 MSRP. The SoundMate 2.1 with two 2-inch 5-Watt discrete stereo speakers plus a separate 70-watt sub-woofer is retail priced at \$129. The rechargeable AUDEA BATT, battery pack that runs the AUDEA on average for 5 hours is retail priced at \$119.

## **AUDEA® INC.**

Audea Inc.'s mission is to dramatically simplify and enhance people's entertainment experience with voice controlled, intelligent app processor speakers. Audea is the world's first "Intelligent Speaker" that runs the music app so you don't need a phone to browse and play 100's of online music apps and HD 10-band EQ quality music. Audea is a spin-off of Mozaex® which over the past 35 years has shipped hundreds of thousands of smart entertainment products to world class companies including IMAX® and thousands of dealers in 35 countries. Audea's VOXXI® voice control technology is patent protected.
