Odyssey Toys is a family-owned and operated business committed to delivering the finest innovative hi-tech gadgets and remote-control toys. With over 20 years of expertise as an industry leader in fun drone technology and offices in Miami, Los Angeles and Hong Kong, Odyssey Toys has demonstrated time and time again that they are a rapidly growing, dynamic company at the forefront of developing interactive tech toys for men, women and children of all ages.

Pocket Drone

The next generation of drones is here! Fold in motors literally let you take your drone in your pocket. Auto Start & Stop makes it easier for beginners to learn to fly. Its versatility even lets you fly indoors or outdoors. Record HD videos and take high-resolution photos and save them onto the included 4GB micro SD card. The size of an iPhone 6, this first generation version features collapsible blades that can be tucked neatly inside the unit for easy transport, along with a carry case and remote. The Pocket Drone features next-generation gyro technology to ensure operation with incredible stability, as well as 2.4 Ghz Wi-Fi technology, USB charging and LEDs for night flying. MSRP \$129.95

X-9 Photon

The new X-9 Photon hexacopter from Odyssey Toys gives you some of the most advanced controls ever found in a nanodrone! The Odyssey G-Sensor enabled controller lets you control the next-gen nanodrone with the flick of a wrist. Fly in 360° space with your hands as the controller! MSRP \$59.95

X-7 Microlite

Turn the sky into your playground with your very own advanced micro drone! X-7 Microlite's advanced design means you'll dominate the sky in no time. Precision controls and a 2.4 Ghz transmitter gives you the power you need to dive, dip, and dart through the air like a pro. It's easy to fly and takes off from any surface, even the palm of your hand! Designed with nighttime flying in mind, its fiber-optic LED lights make nocturnal flying easy and cool. With an X-7 Microlite flyer, it's only a matter of time before you become an ace pilot! MSRP \$79.95

Galaxy Seeker II

The upgraded 2016 model includes a high-definition camera, has a 720p wide-angle lens and advanced stability that includes Auto Hover & Auto Stop for an easygoing flight. The Galaxy Seeker II provides a completely new flying experience thanks to first-person view (FPV) video recording and virtual reality (VR) capabilities. Seeing the world like never before, the Galaxy Seeker II offers super agile, 360 degree maneuvering and a real-time 5.8 Ghz digital remote and high-definition video feed. Through the Galaxy Seeker II's VR phone app and included VR headset, users can record and save videos and images directly to the provided 4GB Micro SD card. With built-in Headless SmartFly technology, the Galaxy Seeker II is compatible with Google Cardboard, giving thrill seekers a 3-D video flying experience. MSRP \$179.95

StarChaser

In-flight VR gives you the ultimate control. Fly anywhere, anytime while shooting photos and HD Video. Take the ultimate pictures on vacation or during playtime with the family. The next generation gyros and advanced flight algorithms provide the ultimate stability and agility! MSRP \$199.95

Turbo Runner

Capable of going just about anywhere, the Turbo Runner climbs walls and ceilings with ease. The Turbo Runner is a master of all tricks. Transitioning from flight to running mode, it darts across walls then dashes across ceilings – it even runs down staircases. Mimicking a design that was developed in conjunction with the U.S. Navy for a real-life UAV (Unmanned Aerial Vehicle), the Turbo Runner fears no trick thanks to its patented cage, which minimizes any force of impact. Master the trimming controls, and soon you'll be performing amazing stunts never before possible with a flying RC vehicle. MSRP \$49.95
